*How to Localize Marxism in China* Guo Jianning 2022-12-30 This book explores frontier issues concerning the localization of Marxism in China by examining historical processes, cultural implications, and contemporary perspectives on this process of indigenization. Emerging in the 1840s in Germany, Marxism has evolved from a German, European, and Western idea into a Chinese, Asian, and Eastern one. This title seeks to answer the question of how Marxism has been adapted to the Chinese context and how it migrated the regions. The first three chapters chart the history of the dissemination of Marxism to adapt to Chinese conditions across three periods - revolutionary times before 1949, the period of socialist construction after 1949, and the reform and opening-up since 1978. The subsequent two chapters analyze the experience of the development of socialism with Chinese characteristics, featuring synergistic integration with traditional Chinese culture and the combining of the basic principles of Marxism and China's real-life situation. The final chapter advances suggestions on how to further promote the localization of Marxism and how to develop contemporary Chinese Marxism, faced with new historical conditions. The book will appeal to scholars, students, and general readers interested in contemporary Marxism, Marxism in China, and contemporary Chinese history, politics, and society.

**Responding to Intimate Partner Violence and Sexual Violence Against Women** World Health Organization 2013 A health-care provider is likely to be the first professional contact for survivors of intimate partner violence or sexual assault. Evidence suggests that women who have been subjected to violence seek health care more often than non-abused women, even if they do not disclose the associated violence. They also identify health-care providers as the professionals they would most trust with disclosure of abuse. These guidelines are an unprecedented effort to equip healthcare providers with evidence-based guidance as to how to respond to intimate partner violence and sexual violence against women. They also provide advice for policy makers, encouraging better coordination and funding of services, and greater attention to responding to sexual violence and partner violence within training programmes for health care providers. The guidelines are based on systematic reviews of the evidence, and cover: 1. identification and clinical care for intimate partner violence 2. clinical care for sexual assault 3. training relating to intimate partner violence and sexual assault against women 4. policy and programmatic approaches to delivering services 5. mandatory reporting of intimate partner violence. The guidelines aim to raise awareness of violence against women among health-care providers and policy-makers, so that they better understand the need for an appropriate health-sector response. They provide standards that can form the basis for national guidelines, and for integrating these issues into health-care provider education.

**Combined Parent-Child Cognitive Behavioral Therapy** Melissa K. Runyon 2013-09-19 Violence is an epidemic that negatively impacts children across their lifespan. Reports indicate 2.1 million youth have experienced physical abuse during their lifetimes, disrupting the healthy development of children from the toddler years through adolescence, and most cases involve parents. Some parents lack the skills to effectively parent and use physical discipline as a strategy to control their children's problem behaviors. They may use increasing force if children continue to be noncompliant, which places many children at-risk for harm. Combined Parent-Child Cognitive Behavioral Therapy (CPC-CBT), created by Melissa K. Runyon and Esther Deblinger and outlined in this guide, provides an evidence-based intervention aimed at empowering families to develop optimistic outlooks on parenting and peaceful home environments, and to decrease stress experienced both by parents and children. CPC-CBT incorporates elements from empirically supported CBT models for families who have experienced physical abuse, sexual abuse, and domestic violence; additionally, CPC-CBT draws on concepts from developmental theory, learning theory, family systems theory, and motivational interviewing. The target population includes children (ages 3-17 years) and their parents/caregivers who have already engaged in or are at-risk for physically abusive behavior towards their children. This manual is for clinicians, clinical supervisors, administrators, and others who are considering the implementation of CPC-CBT in their agencies with families at-risk for child physical abuse.

**Consumer and SME Credit Law** Nora Beausang 2021-12-16 With 2000+ pages of guidance, this important new textbook provides an extensive and in-depth guide to the current labyrinthine regulatory regime relating to consumer and SME credit (by way of cash loans) and protection generally, including the Consumer Protection Code, the Consumer Credit Act (housing loans and non-housing loans), the EU Consumer Credit Regulations, the EU Mortgage Credit Regulations and the Central Bank Housing Loan Regulations. Other lending-related conduct of business requirements are also covered in detail, including the Code of Conduct on Mortgage Arrears, the Lending to SME Regulations, the Code on Related Parties Lending and the Credit Reporting Act, together with applicable EBA/ECB Guidelines dealing with loan origination, product oversight and governance, non-performing exposures/loans and arrears. The regulated activities triggering authorisation as a retail credit firm or credit servicing firm are also addressed in detail.

The book additionally extends beyond lending to have application to the wider business of regulated firms in the financial services arena, dealing in detail with issues including the general principles and requirements of the Consumer Protection Code, the fitness and probity regime including the area of minimum competency, distance marketing requirements and other background to the regulatory regime in Ireland including the increased regulatory focus on the culture of regulated firms and product oversight and governance. The available redress/recourse mechanisms are also covered, including the Financial Services and Pensions Ombudsman, the Credit Review Office, the regulatory and other consequences of breach of applicable requirements and the significant risk management area for regulated firms of their customers' statutory right to redress on breach of financial services legislation. In addition, the book has relevance to professionals dealing with consumers in any contractual context including extensive treatment of how the concept of 'consumer' has developed under common law, the unfair commercial practices regime and the increasingly topical area of unfair contract terms legislation. Relevant case law of the Irish courts and other common law jurisdictions, together with an expanding corpus of decisions from the CJEU, are addressed in detail. This book's practical style is designed to assist bankers, other regulated firms, lawyers, compliance professionals and regulators in the application of a complex area. Rather than simply setting out the separate requirements, the book seeks to navigate the at times contradictory legislative and regulatory strands to give (in so far as is possible) a coherent sense of how they integrate. Much of the content is unique and cannot be found in any other publication. An essential addition to the library of every lender, practitioner and compliance and regulatory risk professional, particularly in the areas of consumer and SME credit.
