The Rise of Liberal Religion Matthew Hedstrom 2013 Winner of the Frank S. and Elizabeth D. Brewer Best First Book Prize of the

American Society of Church History Named a Society for U. S. Intellectual History Notable Title in American Intellectual History The story of liberal religion in the twentieth century,

Matthew S. Hedstrom contends, is a story of cultural ascendancy. This may come as a surprise-most scholarship in American religious history, after all, equates the numerical decline of the Protestant mainline with the failure of religious liberalism. Yet a look beyond the pews, into the wider culture, reveals a more complex and fascinating story, one Hedstrom tells in *The Rise of Liberal Religion*. Hedstrom attends especially to the critically important yet little-studied arena of religious book culture-particularly the religious middlebrow of mid-century-as the site where religious liberalism was most effectively popularized. By looking at book weeks, book clubs, public libraries, new publishing enterprises, key authors and bestsellers, wartime reading programs, and fan mail, among other sources, Hedstrom is able to provide a rich, on-the-ground account of the men, women, and organizations that drove religious liberalism's cultural rise in the 1920s, 1930s, and 1940s. Critically, by the post-WWII

period the religious middlebrow had expanded beyond its Protestant roots, using mystical and psychological spirituality as a platform for interreligious exchange. This compelling history of religion and book culture not only shows how reading and book buying were critical twentieth-century religious practices, but also provides a model for thinking about the relationship of religion to consumer culture more broadly. In this way, *The Rise of Liberal Religion* offers both innovative cultural history and new ways of seeing the imprint of liberal religion in our own times.

Ira Lapidus' A History of Islamic Societies has become a classic in the field, enlightening students, scholars, and others with a thirst for knowledge about one of the world's great civilizations. This book, based on fully revised and updated parts one and two of this monumental work, describes the transformations of Islamic societies from their beginning in the seventh century, through their diffusion across the globe, into the challenges of the nineteenth century. The story focuses on the organization of families and tribes, religious groups and states, showing how they were transformed by their interactions with other religious and political communities. The book concludes with the European commercial and imperial interventions that initiated a new set of transformations in the Islamic world, and the onset of the modern era. Organized in narrative sections for the history of each major region, with innovative, analytic summary introductions and conclusions, this book is a unique endeavour.

The Individual and Society in Islam

Abdelwahab Bouhdiba 1998-01-01 This volume, the first of six to be published, studies fundamental values of Islam, along with the nature of rights and the responsibilities in a general context. The authors analyse the development of social thought and morality in Islam, and ways in which they are enforced through the family and education. Particular attention is paid to the status of women, children, youth and the socially excluded. Several chapters broach specially Islamic approaches to economics, government and justice. A world religion since its inception in the seventh century A.D., Islam is today seeking vigorous answers to contemporary problems through its multi-faceted history. Issues of poverty and wealth, inequality and demands for political expression, and respect for diversity in a difficult world of conformity are dealt with in this series. The study is organized along thematic rather than chronological lines and

thus it is not necessary to read the volumes in order. Volume II is in fact the first to have been published. Volume IV is forthcoming end 2002, volume V mid 2003 and volumes III and VI in 2004. Disease Control Priorities, Third Edition (Volume 9) Dean T. Jamison 2017-12-06 As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this

volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

Contemporary Bioethics Mohammed Ali Al-Bar 2015-05-27 This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the

creation of al-fitr' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice - the maqa' sid - which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of

the ethical issues involved.

Abrahamic Reflections on Randomness and Providence Kelly James Clark 2021-09-27 This open access book addresses the question of how God can providentially govern apparently ungovernable randomness. Medieval theologians confidently held that God is provident, that is,

God is the ultimate cause of or is responsible for everything that happens. However, scientific advances since the 19th century pose serious challenges to traditional views of providence. From Darwinian evolution to quantum mechanics, randomness has become an essential part of the scientific worldview. An interdisciplinary team of Muslim, Christian and Jewish scholars—biologists, physicists, philosophers and theologians—addresses questions of randomness and providence.

The Islamic World John L. Esposito 2004-05-13 Since the events of September 11, 2001, students and people everywhere are filled with questions about Islam. What do Muslims believe? Who is Osama bin Laden? What is a jihad? Even though Islam is a major religion with more than one billion followers worldwide and more than six million in the United States alone, there is still uncertainty and misunderstanding about the ideas, tenets, and practice of Islam. Understanding Islam and the people who believe

in it has become crucially important in the greater world. The Islamic World: Past and Present is the ideal source for fostering understanding and answering questions. John Esposito's acclaimed four-volume The Encyclopedia of the Modern Islamic World (1995) set the standard in references on Islam. Adapted from this award-winning set, The Islamic World: Past and Present brings all the scholarship and information of the original to general readers and college and high school students. In addition to the more approachable language and user-friendly page layout, this reference covers events and changes of the last eight years. It also includes entirely new entries to provide coverage of the pre-modern world of Islam. Containing more than 300 articles, it provides an excellent, comprehensive resource for gaining understanding into a belief system that seems mysterious and incomprehensible to many.

The Book of the Jihad of 'Ali ibn Tahir al-Sulami (d. 1106) Niall Christie 2017-07-05 In 1105, six years after the first crusaders from Europe conquered Jerusalem, a Damascene Muslim jurist named 'Ali ibn Tahir al-Sulami (d. 1106) publicly dictated an extended call to the military jihad (holy war) against the European invaders. Entitled Kitab al-Jihad (The Book of the Jihad), al-Sulami's work both summoned his Muslim brethren to the jihad and instructed them in the manner in which it ought to be conducted, covering topics as diverse as who should fight and be fought, treatment of prisoners and plunder, and the need for participants to fight their own inner sinfulness before turning their efforts against the enemy. Al-Sulami's text is vital for a complete understanding of the Muslim reaction to the crusades, providing the reader with the first contemporary record of Muslim preaching against the crusaders. However, until recently only a small part of the text has been studied by

modern scholars, as it has remained for the most part an unedited manuscript. In this book Niall Christie provides a complete edition and the first full English translation of the extant sections (parts 2, 8, 9 and 12) of the manuscript of al-Sulami's work, making it fully available to modern readers for the first time. These are accompanied by an introductory study exploring the techniques that the author uses to motivate his audience, the precedents that influenced his work, and possible directions for future study of the text. In addition, an appendix provides translations of jihad sermons by Ibn Nubata al-Fariqi (d. 985), a preacher from Asia Minor whose rhetorical style was highly influential in the development of al-Sulami's work.

Arab Seafaring in the Indian Ocean in

Ancient and Early Medieval Times George F.

Hourani 1995-07-23 In this classic work George Hourani deals with the history of the sea trade of the Arabs in the Indian Ocean from its obscure origins many centuries before Christ to the time

of its full extension to China and East Africa in the ninth and tenth centuries. The book comprises a brief but masterly historical account that has never been superseded. The author gives attention not only to geography, meteorology, and the details of travel, but also to the ships themselves, including a discussion of the origin of stitched planking and of the lateen fore-and-aft sails. Piracy in the Indian Ocean, day-to-day life at sea, the establishment of ancient lighthouses and the production of early maritime guides, handbooks, and port directories are all described in fascinating detail. Arab Seafaring will appeal to anyone interested in Arab life or the history of navigation. For this expanded edition, John Carswell has added a new introduction, a bibliography, and notes that add material from recent archaeological research.

Exposing as false the idea that Islam and Muslims are incomprehensible to Western culture, this book will become the first choice for students and experts in religion from disparate fields, who wish to know how Islam relates to vital concepts in religion and society today.

The Topkapi Scroll Gülru Necipoğlu
1996-03-01 Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all

historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised “dead” drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll’s patterns could be used to design a three-dimensional vault.

Answering Jihad Nabeel Qureshi 2016-03-08 From New York Times bestselling author of *Seeking Allah, Finding Jesus* Nabeel Qureshi—a former Muslim—comes his deeply personal, challenging, and respectful answer book to the many questions surrounding jihad, the rise of ISIS, and Islamic terrorism. San Bernardino was the most lethal terror attack on American soil since 9/11, and it came on the heels of a coordinated assault on Paris. There is no question that innocents were slaughtered in the name of Allah and in the way of jihad (meaning warfare against the enemies of Islam, in this case). But do the terrorists' actions actually reflect the broader religion of Islam? The answer to this question is more pressing than ever, as

many Muslim refugees are still migrating to the West, seeking shelter from the violent ideologies of ISIS, Al-Qaida, and other radical Islamic groups. Setting aside speculations and competing voices, Qureshi explores the answers to difficult questions like: What is Islam, and is it a religion of peace or violence? Is there a clear definition and doctrine of jihad? How are we to understand jihad and radical expressions of Islam in relation to our Muslim neighbors and friends? Why is there such a surge of Islamist terrorism in the world today, and how should we respond? How does jihad compare with Old Testament calls to warfare? In Answering Jihad, bestselling author Nabeel Qureshi answers these urgent questions from the perspective of a former Muslim who is deeply concerned for both his Muslim family and his American homeland.

The Place of Tolerance in Islam Khaled Abou El Fadl 2002-11-08 Khaled Abou El Fadl, a prominent critic of Islamic puritanism, leads off this lively debate by arguing that Islam is a

deeply tolerant religion. Injunctions to violence against nonbelievers stem from misreadings of the Qur'an, he claims, and even jihad, or so-called holy war, has no basis in Qur'anic text or Muslim theology but instead grew out of social and political conflict. Many of Abou El Fadl's respondents think differently. Some contend that his brand of Islam will only appeal to Westerners and students in "liberal divinity schools" and that serious religious dialogue in the Muslim world requires dramatic political reforms. Other respondents argue that theological debates are irrelevant and that our focus should be on Western sabotage of such reforms. Still others argue that calls for Islamic "tolerance" betray the Qur'anic injunction for Muslims to struggle against their oppressors. The debate underscores an enduring challenge posed by religious morality in a pluralistic age: how can we preserve deep religious conviction while participating in what Abou El Fadl calls "a collective enterprise of goodness" that cuts

across confessional differences? With contributions from Tariq Ali, Milton Viorst, and John Esposito, and others.

A Little History of the World E. H. Gombrich 2014-10-01 E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For

this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

The Far Right Today Cas Mudde 2019-10-25 The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world's largest democracies – Brazil, India, and the United States – now have a radical right leader, while far-right parties continue to increase their profile and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and

consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time.

The Oxford History of Islam John L. Esposito 2000-04-06 Lavishly illustrated with over 300 pictures, including more than 200 in full color, The Oxford History of Islam offers the most wide-ranging and authoritative account available of the second largest--and fastest growing--religion in the world. John L. Esposito, Editor-in-Chief of the four-volume Oxford Encyclopedia of the Modern Islamic World, has gathered together sixteen leading scholars, both Muslim and non-Muslim, to examine the origins and

historical development of Islam--its faith, community, institutions, sciences, and arts. Beginning in the pre-Islamic Arab world, the chapters range from the story of Muhammad and his Companions, to the development of Islamic religion and culture and the empires that grew from it, to the influence that Islam has on today's world. The book covers a wide array of subjects, casting light on topics such as the historical encounter of Islam and Christianity, the role of Islam in the Mughal and Ottoman empires, the growth of Islam in Southeast Asia, China, and Africa, the political, economic, and religious challenges of European imperialism in the nineteenth and twentieth centuries, and Islamic communities in the modern Western world. In addition, the book offers excellent articles on Islamic religion, art and architecture, and sciences as well as bibliographies. Events in the contemporary world have led to an explosion of interest and scholarly work on Islam. Written for the general reader but also appealing to

specialists, The Oxford History of Islam offers the best of that recent scholarship, presented in a readable style and complemented by a rich variety of illustrations.

The Muslim World After 9/11 Angel Rabasa 2004-11-17 Momentous events since September 11, 2001-Operation Enduring Freedom, the global war on terrorism, and the war in Iraq-have dramatically altered the political environment of the Muslim world. Many of the

forces influencing this environment, however, are the products of trends that have been at work for many decades. This book examines the major dynamics that drive changes in the religio-political landscape of the Muslim world-a vast and diverse region that stretches from Western Africa through the Middle East to the Southern Philippines and includes Muslim communities and diasporas throughout the world-and draws the implications of these trends for global security and U.S. and Western interests. It presents a typology of ideological tendencies in the different regions of the Muslim world and identifies the factors that produce religious extremism and violence. It assesses key cleavages along sectarian, ethnic, regional, and national lines and examines how those cleavages generate challenges and opportunities for the United States. Finally, the authors identify possible strategies and political and military options for the United States to pursue in response to changing conditions in this critical

and volatile part of the world.
